

Township Tour

Half Day Tour

The first view most travellers have when entering or leaving one of our big cities are the huge informal settlements also known as townships.

Find out what gave rise to townships and how this township living became an inspiration to a lot of artists and why a lot of people feel at home here.

Experience this unique culture with us by walking with a local guide through a township, try their traditional beer and see the many arts and crafts they produce. Discover what a “sangoma” is and its importance in the local community. The different traditions, practises make for a fascinating experience. “By discovering another culture is a way of discovering oneself and as we pair away the obvious one finds a unique way of looking and living life translated into African music and literature.”

This particular tour should be booked ahead of time as we would love you to have lunch also in a township near Cape Town, some of the best food I had in Cape Town comes from here. This would then conclude a full sensory experience to the visitor. One should feel, taste listen and see a culture to be able to understand and experience it. Tour times are either AM or PM.

Tour Highlights
